Projects:

Portfolio : frontend website fully responsive.

This frontend website is completely Built with React JS (routing,animation, responsiveness), Tailwind CSS, Node JS, router. Also using javascript logics (map method, importing images) my portfolio website defines me by all means.

Game : Tic Tac toe || stone paper scissor game.

Both these games developed using HTML (hyper text markup language), CSS (cascading style sheet) and JS (javascript) foundations. like DOM (document object model, two-D arrays, built in libraries, loops) etc.

Clone : Amazon || Netflix UI clone.

The elegant UI's(user interface) are designed by HTML(hyper text markup language) for structure and CSS(cascading style sheet) for making the page attractive like color combinations, elements alignment etc.
